The **Navigation Bar** shown below is located at the top of the page.

The Folders Tab

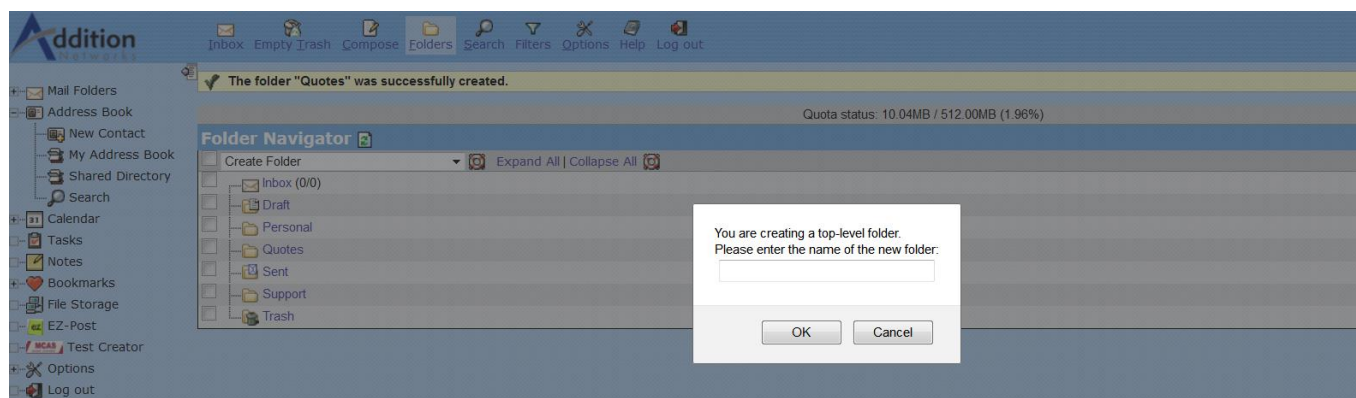

This is where you will create folders to help with organization of your email messages. Creating folders to organize your email will save you a great deal of time and it's easy to do. Note, however, that mail moved out of the Inbox will no longer be hosted on the mail server and therefore not available to other SMTP/POP3 clients.

By default, the Inbox is created for you. The Sent folder is created the first time you send an email, the Trash folder is created the first time you delete an email, and the Draft folder is created the first time you save a draft message.

To create additional folders

- Select 'Create Folder' from the drop-down menu.
- Type the name of the folder in the pop-up box.
- Click the 'Ok' button

*By default, the new folder will be created under the Inbox.
